

THE JING-ZHANG SWITCHBACK

UP THE GRADE — THE CITY UPGRADES ITSELF

Key Detailed-Design Areas

Applied (Dazhongsil) • Research (Origin) • Acceleration (Zhongzhiyuan) — climbing north along the main line

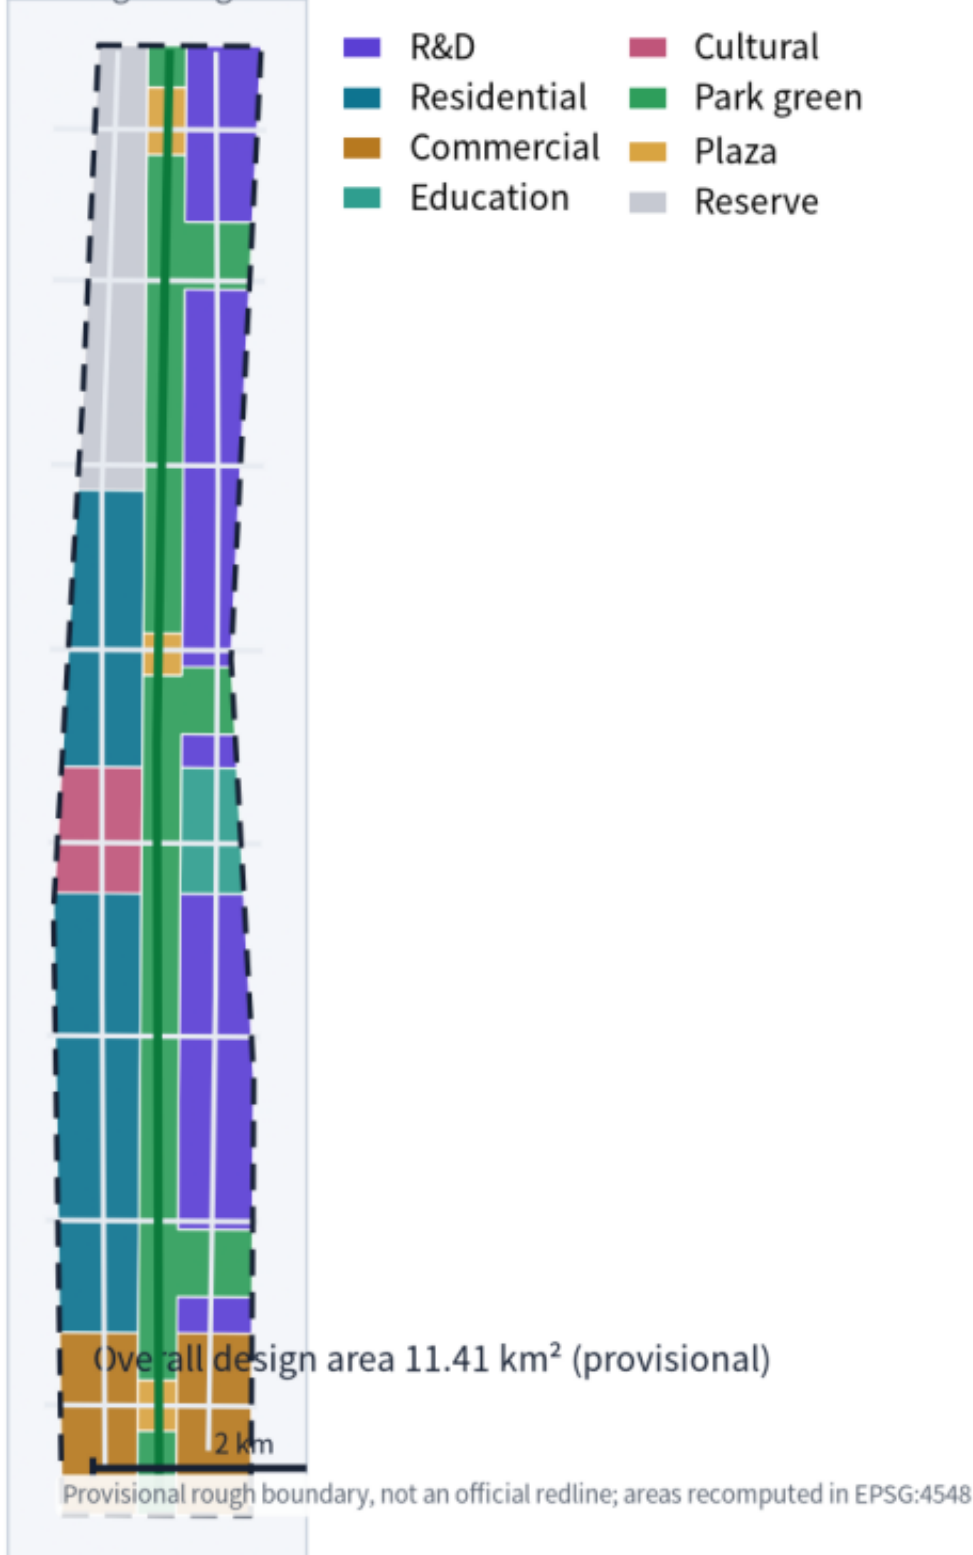

- Dazhongsil AI Industry Cluster**
Applied Grade-0 | 72.0 ha (announced)
Scenario-native • scenario supermarket • stele
- Beijing AI Origin Community**
Research Grade-1 | 104.3 ha (announced)
Open source • paper-to-product • residency
- Zhongzhiyuan AI Acceleration Area**
Acceleration Grade-2 | 192.1 ha (announced)
Full-stack • governance sandbox • verification

Land-use Structure & Spatial Framework

One main line • three grade bands • three nodes • two sidings • eight stitches

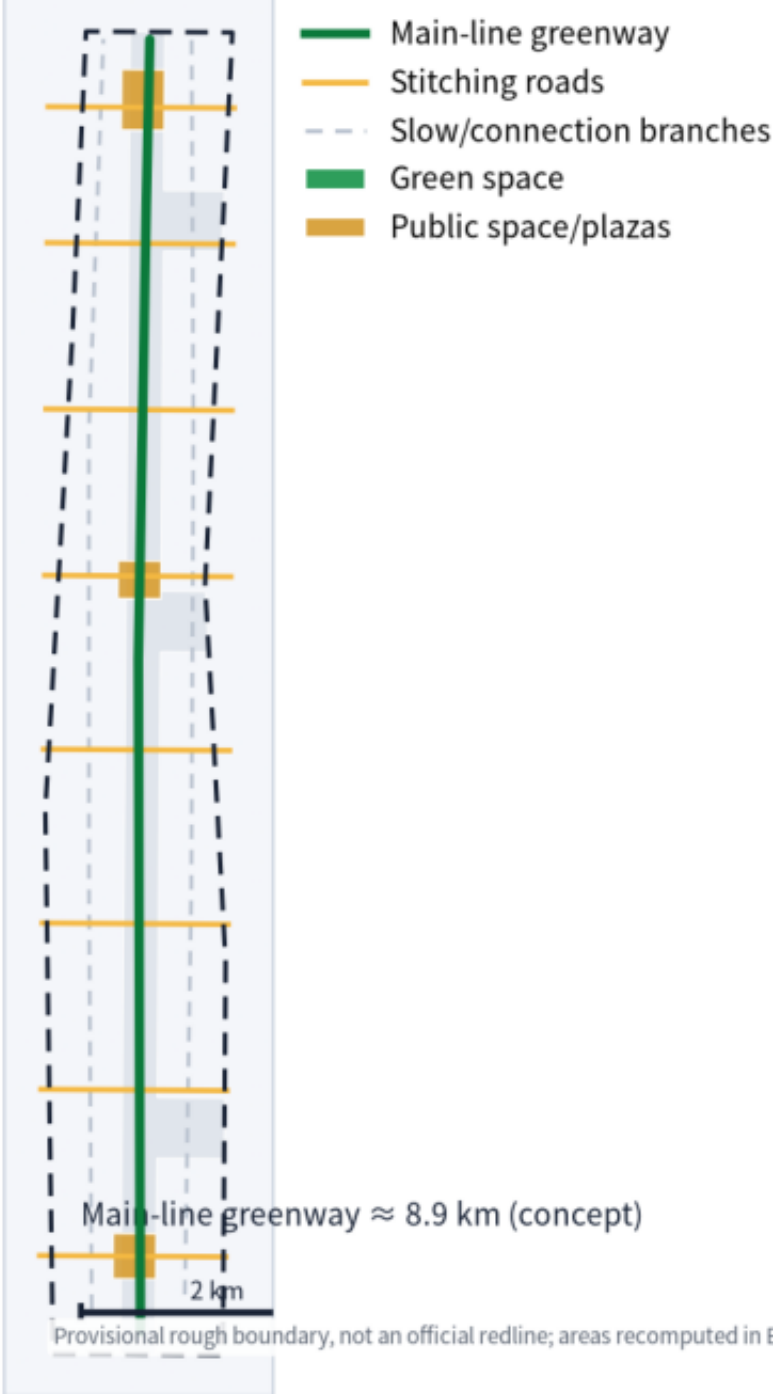

Source: submissions/xiaopi668/jingzhang-grade-line-geometry + metrics

Spatial framework

Mobility & Blue-Green Public Space System

Main-line greenway links grade bands • 8 east-west stitching roads • plazas and parks anchor public nodes

- 8

Stitching roads
- 8.9 km

Main-line greenway (concept)
- 3

Switchback plazas
- 3

Switchback parks
- 2

Station connections

Core Metrics & Evidence Chain									
All data metrics are generated from the validated City-Scale GIS (EPG 4548), and derived from the primary measurement figures.									
Overall design area		Green space		Green ratio		Public space			
11.41 km²		278.53 (31 m²)		24.4 %		33.34 (31 m²)			
Public space ratio		Building footprint (concept)		Building height (concept)		PM (predicted metrics)			
2.9 %		139.76 (31 m²)		38.97 km		unknown			
provisional boundary		11 Jan 2026		EPG 4548		30 meters		Figure 1/16
